

Food Waste Disposer: IMC 526

Construction

IMC 526 is a free standing disposer. Well suited for small and medium size kitchens.

Equipment / features:

- Integrated controls
- Automatic water control
- Metal baffle and time delayed interlock system
- Rubber housing to minimize noise.
- Automatic thermal overload to protect motor.
- Manually reversible motor for extended operational life.

Use

IMC Food Waste Disposers offer excellent throughput and performance at low operating cost with a high degree of operator safety.

A long-life motor combined with special alloy grinding elements enable a variety of soft food waste, including plate scrapings and vegetable peelings to be disposed of quickly and safely.

Voltages:

230V single phase 50 or 60Hz
230/400/440V 3-phase

Options:

500 series food waste disposers are also available for mounting under sink or welding into table
See separate leaflet.

Capacity:

200 kg/hour or 400 covers pr. sitting

- **EASY CLEANING**
- **ENERGY EFFICIENT**
- **SAFE OPERATION**
- **COMPACT DESIGN**
- **RECYCLABLE**
